Marl Jonson

Martinez, CA | (925) 812-6907 | marl.jonson@comcast.net | linkedin/marl-jonson | github/marljonson | marl.dev

Education

San Jose State University **Expected Graduation: May 2027**

Bachelor of Science in Computer Science *San Jose, CA*

- **Coursework:** Software Engineering, Operating Systems, Database Systems, Computer Networks, Data Structures & Algorithms
- **Organizations:** Responsible Computing Club, Product Management Club, Software & Computer Engineering Society, Spartan Analytics

Experience

Mission Support and Test Services, Nevada National Security Sites May 2026 – Aug. 2026

Software Engineer Intern *North Las Vegas, NV*

- Migrated in-house and commercial/government off-the-shelf apps from .NET 8 to .NET 10 on Visual Studio
- Rewrote object mapping profiles from AutoMapper to open-source Mapster object mapping library
- Upgraded NuGet packages/dependencies and repaired build errors to ensure .NET 10 compatibility
- Created and tracked Azure DevOps projects and tasks in an Agile software development environment
- Shared progress and participated in weekly stand-ups with a team of 13 full-time analysts

San Francisco Bay Area Rapid Transit District Apr. 2025 – Apr. 2026

Product Management Intern *Oakland, CA*

- Developed Transiteers, a modular Scratch video game introducing youth to careers in public transit
- Interviewed 10+ subject matter experts to record various duties and responsibilities of employees
- Conducted user gameplay testing with various age demographics on-site in Oakland and Berkeley, California
- Collected qualitative user feedback and iteratively redesigned and redeveloped video game features

SJSU Responsible Computing Club Jun. 2025 – Mar. 2026

Software Engineering Ambassador *San Jose, CA*

- Developed and deployed a full-stack web application using React, TypeScript, and backend APIs with version control via GitHub
- Built and maintained responsive web designs using Next.js, Tailwind CSS for styling, and Auth0 for secure authentication
- Created Figma wireframes and user flows for UI/UX prototyping; engaged in bi-monthly Agile sprints and weekly stand-ups
- Performed 5+ user interviews using A/B testing to evaluate the usefulness of website features on club members and officers

Projects

Queue-Cumber (Distributed .NET Health Tech Pipeline) | *C#, ASP.NET Core, Blazor, Hl7.Fhir.R4, SQL Server, EF Core, RabbitMQ, Azure*

- Engineered a high-throughput RESTful Web API using ASP.NET Core to process 5,000+ simulated daily clinical data payloads
- Integrated Hl7.Fhir.R4 to dynamically parse and serialize relational database health records into standardized JSON FHIR formats
- Optimized query efficiency by 25% by configuring asynchronous message queues and repository patterns using EF Core and SQL Server
- Enforced enterprise security by implementing JWT and role-based access tokens to satisfy strict healthcare compliance standards

Bento Boxed (Secure Java & Spring Boot FHIR API) | *Java, Spring Boot, Spring Security, OAuth 2.0, PostgreSQL, Docker, Postman*

- Built a secure backend microservice using Java and Spring Boot to map legacy clinical datasets into compliant FHIR resource endpoints
- Implemented OAuth 2.0 and SMART on FHIR protocols via Spring Security to establish strict token authentication for patient records
- Designed a relational PostgreSQL schema to manage complex medical metadata with indexing to maintain low-latency read performance
- Containerized the application using Docker and constructed rigorous end-to-end API test suites inside Postman to validate edge cases

Mockaron (Cross-Platform Clinical Portal) | *React, Android Studio, Kotlin, Node.js, Express, MongoDB, Appium, GitHub Actions*

- Developed a responsive healthcare client interface featuring a React web portal dashboard and a native Android app built in Kotlin
- Constructed a Node.js backend using MongoDB to manage patient-doctor scheduling states and secure user profiles
- Engineered an automated UI testing suite using Appium and Python to achieve 85% code coverage across registration workflows
- Deployed a CI workflow via GitHub Actions to automate linting, bundle building, and rapid test sweeps on every pull request

Technical Skills

Languages & Frameworks: C#, Java, Python, SQL, TypeScript | .NET, ASP.NET Core, Blazor, React, Spring Boot, JPA/Hibernate, EF Core

Cloud & Tools: Microsoft Azure (App Services, Blob Storage, Azure OpenAI), Docker, Kubernetes, Git, REST APIs, Postman, Visual Studio

Concepts: Full-stack development, API design, database modeling, cloud deployment, system reliability, error handling, Agile development

Certifications: Microsoft Certified: Azure AI Cloud Developer Associate (AI-200), Microsoft Certified: Azure Fundamentals (AZ-900), Microsoft Certified: Azure Data Fundamentals (DP-900), Microsoft 365 Certified: Fundamentals (MS-900)
